DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 41-57 are rejected under 35 U.S.C. 103(a) as being unpatentable over Patel et al. (US Pat. 6,248,363).

Patel et al. discloses methods of preparing pellets by combining solvent, such as water, pharmaceutically active agent, such as zolpidem or salt thereof, and microcrystalline cellulose and drying through utilizing appropriate drying processes such as vacuum evaporation, heating etc. (Column 6, lines 7-11, Column 36, lines 40, Column 45, lines 40-68, Column 46, lines 16-62).

The difference between the prior art and the claimed invention is that the prior art does not expressly disclose the formation of pellets by combining a solvent and pharmaceutical agent, carrier to form a wet mixture, wherein the solvent is not combined by spraying, stirring, chopping or both to form pellets and drying. However, the prior art amply suggests the same as processes for forming pellets are disclosed by the cited prior art including the process described above. As such, it would have been well within the skill of one of ordinary skill in the art to modify the prior art as desired with the expectation that the process would form suitable pharmaceutical pellets.

Art Unit: 1616

Therefore, the claimed invention, as a whole, would have been *prima facie* obvious to one of ordinary skill in the art at the time the invention was made, because every element of the invention has been collectively taught by the combined teachings of the references.
